Chapel Lobby

Proposed Redesign

Henderson Local Congregation | District of Mountain States

A welcoming first impression. A clear introduction to the Church. A local story worth sharing.

The proposal creates an open visitor gallery with two television displays, high-quality printed information tiles, a Henderson history display, and literature to take home.

Welcome

The first view on arrival: a warm welcome, congregation identity, and a clear path through the lobby.

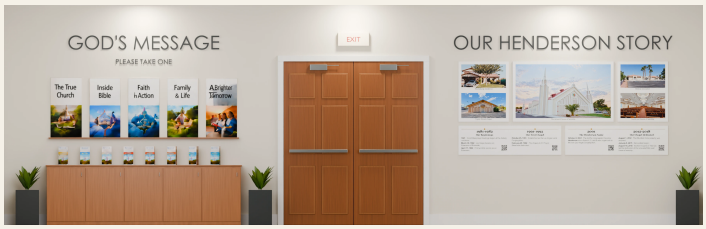

Learn About the Church

About Us; History; Prophecy; One True Church; Worship; Have Questions?

The Church of Christ Today

Houses of Worship; Faith Across Cultures; Member Stories; Youth & Families; Community Outreach; INC Media.

Our Henderson Story & Literature

Five pure-white panels share Henderson's story. Nearby literature lets visitors take a message home.

CONCEPT ONLY

Learn: 36 x 15 in. Today: 18 x 30 in. Henderson: 108 x 48 in overall, including 2-inch gaps. Verify mounting and scanning heights on site.

FROM PROPOSAL TO EXPERIENCE

Simple to visit. Easy to maintain.

The visitor experience

01

Scan the TV

A rotating access QR connects the visitor's phone to that television.

02

Explore a topic

The phone's built-in scanner reads a permanent identifier on any tile.

03

Choose and watch

Select from several videos and add a request to the TV queue, or watch on the phone.

Designed for shared use

Each TV has its own queue, a maroon video layout, captions, and guest access QR. When idle, welcome photos, upcoming activities, and worship schedules rotate. Waiting guests get five-minute turns, followed by a 15-second private continuation QR.

Printed once, updated online

Tile codes contain topic identifiers, not website addresses. Videos and online descriptions can change without reprinting the code. Physical photo or text changes require a new print. The public presentation is shareable; live phone controls require TV access.

Three practical stages

1

Repainting & lettering

Prepare and repaint the lobby; install raised lettering. Confirm layout and material samples before ordering.

2

Place the televisions

Mount two displays, provide power and network access, and test each TV browser. Add a small computer only if the TV cannot run the system reliably.

3

Add the information displays

Install the photo tiles, Henderson timeline, and literature. Test QR scanning at real height on both iPhone and Android, then rehearse the visitor flow.

TARGET: UNVEIL BEFORE OCTOBER 25, 2026

Confirm measurements, written quotes, installation dates, and a full-size print proof first.
